## Safety precautions

Dear customer:

Thank you for choosing Himox product. In order to help you read and use this manual properly and prevent personal injury and damage accidents, please read carefully and comply with the content of following symbols.

Any content with this sign must be absolutely prohibited, otherwise it may cause damage to the machine or endanger the personal safety of users.

Any content with this sign must be strictly operated according to the warning content. It concerns product safety and personal safety of users.

-  Do not allow paint, insecticide, alcohol or chemical to be sprayed on the surface of air purifier, or it may cause surface cracks even short circuit occurs which can lead electric shock or fire accident
-  Do not use the air purifier in the room with fumigation type pesticides. Chemical residue could be accumulated inside the machine and then release from the outlet, making harm to health. The room should keep ventilated thoroughly after you use insecticide.
-  Do not use air purifier in flammable, explosive and corrosive gas environment
-  Do not touch the air inlet and air outlet when operating, do not put the hands or any object insert the air inlet and outlet to avoid injury or damage to the air purifier.
-  Do not seat or put objects on the air purifier or it is easy to cause accidental loss or injury.
-  Do not use air purifier in humid conditions like base room, as these situations may cause current leakage which can lead electric shock or fire accident.
-  Do not alter, decompose and repair the air purifier without authorization, otherwise it may cause fire, electric shock, malfunction, etc.

-  Do not touch power plug with wet hand, or else may cause electric shock.
-  Please make sure to turn off the power before cleaning or moving air purifier.
-  When not in use for a long time, please unplug the power cord.
-  When air purifier smells bad, it should be stopped using and shut off. Contact the after-sales personnel; for inspection to avoid malfunction or fire.
-  The outlet is easy to fall into sundries. Please check before use to avoid children putting sundries in it.
-  Air purifiers should be placed at least 50 centimeters away from walls or other obstacles.
-  If the power cord is damaged, in order to avoid danger, it must be replaced by the manufacturer or its maintenance department or similar full-time personnel.

## Product introduction

### Product Component Name

3 in 1 filter ( pre-filter + HEPA H13 filter + Active carbon filter)

# Operation mode and function description

## Maintenance instructions

- 1 Air purifiers are not allowed to be placed on soft or uneven surfaces to avoid the danger of leakage caused by vibration or noise during operation.
- 2 Do not place any thin strips or hard objects in the air purifier to avoid damage to the machine.

- 3 When turning off or not using for a long time, please unplug the power cord and put the machine where it is not suitable for children to touch.
- 4 In order to have a good purification effect, the machine should be kept in a wide area to avoid obstructing air circulation.

- 5 When the machine is being maintained, checked and moved, please turn it off and unplug the power cord. Otherwise, it may cause electric shock and injury.
- 6 When the composite filter is expired, you can contact the seller to purchase it.

Cut off the power supply in any of the following maintenance steps

In order to improve the service life of air purifier, please maintain the air purifier regularly. Before maintenance please turn off the air purifier and unplug the power cord. If the purifier needs to replace the filter, the indicator light of filter on the control panel will flash to remind users to replace the filter.

### 1. Clean surface

When cleaning the surface of air purifier, please cut off the power supply and clean it with soft and clean cloth. Do not clean it with alcohol, gasoline, benzene and other chemical solvents.

## 2. Remove all plastic bags of the filter

Before using the air purifier for the first time, please open the back cover of the air purifier and take out the filter, and make sure to remove the plastic bag of the filter, otherwise the product will not be able to purify the air normally.

Please keep plastic bags away from babies and toddlers so as to avoid accidents when babies and toddlers come into contact with plastic bags.

## 3. Clean or replace filter
